

LƯƠNG VĂN THẮNG

Software Engineer Intern

☎ 0372036292 ✉ vanthang.luong2k4@gmail.com 🌐 vanthang13.id.vn

ABOUT ME

Final-year Information Technology student with hands-on experience developing web applications using Java, Spring Boot, React, and MySQL. Experienced in building RESTful APIs, JWT-based authentication, role-based authorization, database design, and third-party payment integration. Also developed a semantic product search service using Python, FastAPI, and PostgreSQL with pgvector. Seeking a Software Engineer Intern position to apply my backend development skills and gain experience in a professional engineering environment.

EDUCATION

Saigon Technology University (STU)

- **Major:** Information Technology
- **GPA:** 3.0
- **Timeline:** 2022 - 2026
- **Status:** Completed the training program (Expected graduation: November 2026)

TECHNICAL SKILLS

- **Languages & Core:** Java, JavaScript, HTML5, CSS3
- **Backend Development:** Java, Spring Boot (RESTful API, Spring Data JPA)
- **Database:** MySQL (Database Design, SQL Queries)
- **Frontend Development:** React.js, Responsive Web Design, Component-based Architecture
- **Web Fundamentals:** RESTful API Concepts, HTTP/HTTPS, OOP
- **Tools & Workflow:** Git, GitHub, Postman

PROJECTS

Multi-Vendor E-commerce Platform

Individual Project | Full-stack Web Application

[GitHub: [Backend](#) | [Frontend](#) | [Semantic Search](#)]

Backend

- Developed the backend using Java 21, Spring Boot 3, Spring Security, JWT, Spring Data JPA, Flyway, and MySQL.
- Designed and implemented RESTful APIs and role-based authorization for Admin, Shop, and Customer.
- Implemented core e-commerce features including product management, shopping cart, orders, vouchers, reviews, commission configuration, and VNPay payment integration.

Frontend

- Developed the frontend using React 19, Vite, React Router DOM, and Tailwind CSS/UI Library.
- Built interfaces for the Customer Shopping page, Shop Sales Management Channel, and Admin Dashboard.

Semantic Search

- Developed a semantic product search service using Python, FastAPI, PyVi, PostgreSQL, and pgvector.
- Implemented natural-language product search to retrieve semantically relevant products.
